John - I'm not in the office today (my day off). I also need to let you know that I'm on a detail outside of RD (I'm currently in BEAD for the next 4-6 mos.). There will be someone taking my place as PM7 but that hasn't been announced yet. While I'm away from RD I recommend that you contact Jennifer Gaines. She can help you with any rodenticide questions/issues. Regarding combining the ag/PCO labels - you've summarized it accurately in your email. I don't think I have anything else to add.

Regards,
John Hebert

Subject: Meeting Request - Ag/PCO Label Combo's -

Gentlemen,

I confirmed with the EPA that the Ag and PCO labels can appear under the same registration number. They acknowledge that they told me differently and apologize. By being placing PCO and Ag under the same registration number will require an amendment. The Ag mitigation language would still be identical to that required in the risk mitigation decision.

By placing the two labels under the same registration no. will provide a federal maintenance fee savings. Also, there would be a tremendous cost savings in state registrations for the next two years if we were to leave the product names as we have them now.

I would like to schedule a short meeting this afternoon at 3:00 pm, if possible. Please let me know if this works or suggest alternate times.

Thanks,

John Lublinkhof
